

Toltec and Mexica (Aztec) Path: Healing and Dreaming

Seminars in Amsterdam, November 18 – 22, 2011

Sergio Magaña is a healer, author, paqo and leading expert on Mexica (Aztec) and Toltec paths. Through his studies with the keepers of these hidden wisdoms, Sergio developed bioenergetic healing techniques that defy the paradigms set by science and social beliefs, helping more than ten thousand patients achieve amazing results and transcend limitations. Sergio developed techniques that give impressive changes and healing in people who learn to use them. According to people who work with him he has a success rate of 80% with his healings.

Sergio is connected with the Mexica and Toltec paths through his ancestral line, as well as through initiations he received from energies connected to the holy mountains of Mexico. He has been working as a healer since he was young and is the director of his Centro Energetico Integral in Mexico City, a centre for teaching energy work and healing from the Mexica and Toltec Path, as well as from other paths (among these: the Inka Path and the Nordic-Scandinavian Path). Sergio connected to the Andean tradition a few years ago and has been working with Inka knowledge since, connecting this to his own traditions.

In Mexico City where Sergio lives he began in 2000 hosting the radio program “2010 Fast – Forward on Time – 2012 the Days to Come”. In his workshops (in his Centre and internationally) Sergio has guided more than thirty thousand students toward great leaps in the development of consciousness as they experience impressive phenomena. He is also a co-author of the best seller “Transforming through 2012” (this book with contributions of spiritual writers and thinkers can be ordered through www.amazon.com).
